“2350 Broadway 4”

(Pete Namlook & Tetsu Inoue)

It was 1995 when the predecessor of this CD was released. Since then Tetsu Inoue and Pete Namlook developed their way to create music to a different stage. Again the combination of their styles is unique. Meditative, beatless and deep - sound opium. You can hear the individuals as well as the whole soundscapes that evolves and starts a life of their own. For the listener this music is perfect for total relaxation and mind traveling.

CD tracks: Hear the Sun 12.14 / Sustained Energy 9.34 / Extended Wave 10.24
Ethereal Being 6.59 / Take the Sky 11.47 / Two Lives 10.29

DTS 5.1 Music Disc/Stereo 2CD. For compatibility reasons (to listen to the music in the car or at your friend's or if you don't own a DTS capable 5.1 Surround System) we included a stereo CD version in the double CD-pack.
